

## **STAND TOGETHER**

*Chorus*

**We will all stand together and sing a union song  
We will all stand together and know that we belong  
To the strength of the future in a common working bond  
Stand together and sing a union song**

There's trouble fast approaching and the skies are overcast  
But let us not lose sight of all the lessons of the past  
The victories that were fought for in battles loud and long  
By the millions who sang a union song (*together*)

***Chorus***

United we can stand but divided we must fall  
Injustice to the one will mean injustice to us all  
But when we stand together the future will belong  
To the millions who sing a union song (*together*)

***Chorus***

**(optional May Day verse)**

It was on the first of May that I heard the union say  
Eight hours of decent working for eight hours of decent pay  
And we won't forget the reasons why we're marching here  
today  
With the millions who sing a union song

***Chorus***

***Chorus***

**Stand together and sing a union song**
